Professional Summary

Support Engineer with 1.5+ years of experience optimizing **AWS/Azure** infrastructure and automating high-volume workflows via **Python**. Technical specialist in Root Cause Analysis (RCA) and **SQL-based** data troubleshooting. Track record of reducing operational latency by 30% and maintaining 99.9% system uptime through real-time monitoring with **Grafana and Prometheus**.

Technical Skills

Languages/Scripting: Python (Advanced), SQL (PostgreSQL/MySQL), Bash, Java, JavaScript
Operations & CRM: Zoho CRM, HubSpot, Incident Management, RCA, SLA Management
Cloud & DevOps: AWS (Well-Architected), Microsoft Azure, Docker, Jenkins, Kubernetes, Terraform
Observability: Grafana, Prometheus, AWS CloudWatch, ELK Stack, System Monitoring

Work Experience

Support & Cloud Engineer

Aug 2025 – Present

Teleglobal International Pvt. Ltd.

Pune, India

- Engineered **Python automation scripts** that eliminated 15+ weekly manual operational tasks, improving team efficiency by **30%**.
- Managed 20+ production incidents weekly as the **primary technical point-of-contact**, consistently exceeding SLA resolution targets by **15%**.
- Conducted **Root Cause Analysis (RCA)** for complex system failures, leading to the deployment of 5 major stability fixes in collaboration with the Dev team.
- Executed **SQL-based data investigations** to validate 100+ monthly bug reports, reducing the mean time to detect (MTTD) by **25%**.
- Optimized AWS production environments using **Well-Architected remediation**, resulting in a **12% reduction** in monthly cloud infrastructure costs.

Technical Support & Operations Consultant

Jan 2025 – Jul 2025

Kali IO Solutions LLP

Remote

- Facilitated technical alignment between customers and engineering, translating complex requirements into **20+ technical specifications** for product launches.
- Provided high-touch **deployment support** for scaling web applications on AWS, achieving a **95% client satisfaction score** during initial post-launch phases.
- Resolved 50+ pre-deployment technical issues by identifying backend API bottlenecks, ensuring zero-downtime migrations for 3 key accounts.

Key Projects

Automated System Observability Stack — Grafana, Prometheus, Python

Oct 2025 – Nov 2025

- Deployed a real-time monitoring suite using **Grafana and Prometheus**, decreasing average incident response time from 45 minutes to **12 minutes**.
- Developed a CI/CD pipeline via GitHub Actions, reducing manual deployment errors by **40%** and increasing release frequency.
- Implemented automated security auditing with SonarQube, identifying and neutralizing 10+ critical vulnerabilities before production push.

Achievements & Certifications

Patent Author: Deep Learning Driven Lip Reading System (Published Patent Application No.: 202521037574 A).

AWS Certified: Advanced AWS Well-Architected Best Practices (Technical) & Well-Architected Foundations.

AWS Partner: Migration Foundations Knowledge Badge (Hands-on Technical Labs).

Education

Smt. Kashibai Navale College of Engineering

Dec 2021 – Jun 2025

Bachelor of Engineering in Information Technology (CGPA: 7.78/10)

Pune, India

RYK Science College

Jun 2020 – Jun 2021

Higher Secondary Certificate (HSC) (Percentage: 70%)

Nashik, India
