

MILIND RANE

Cloud Engineer | AWS • Kubernetes • Terraform • CI/CD Automation

Pune, India | +91 9021040688 | ranemilind99@gmail.com | linkedin.com/in/milind-rane-clouddevops | github.com/Milindrane01

PROFESSIONAL SUMMARY

Cloud Engineer with 1.5+ years automating production AWS infrastructure using Terraform, Kubernetes (EKS), and Jenkins/GitHub Actions CI/CD. Reduced operational latency 30%, sustained 99.9% uptime, and cut monthly cloud spend 12% through AWS Well-Architected remediation. Strong in Python-based automation, SQL-driven root cause analysis, and full-stack observability (Grafana, Prometheus, CloudWatch).

TECHNICAL SKILLS

- Cloud: AWS (EC2, VPC, IAM, S3, ECR, EKS, ALB, Route 53, Auto Scaling, CloudWatch, Well-Architected), Azure (familiar)
- IaC & Containers: Terraform (modules, remote state), CloudFormation (familiar), Docker, Kubernetes/EKS, Helm
- CI/CD: Jenkins, GitHub Actions, GitHub Webhooks, Amazon ECR, SonarQube, Git
- Observability: Grafana, Prometheus, AWS CloudWatch, ELK Stack
- Languages: Python (Advanced), Bash, SQL (PostgreSQL/MySQL), Java, JavaScript
- Operations: Incident Management, Root Cause Analysis (RCA), SLA Management

WORK EXPERIENCE

Cloud Engineer | Teleglobal International Pvt. Ltd. (Pune)

Aug 2025 – Present

- Deploy and manage containerized applications on Amazon EKS, authoring Kubernetes manifests and Helm charts and implementing Horizontal Pod Autoscaling (HPA) to scale workloads on demand.
- Provision and modularize AWS infrastructure using Terraform (VPCs, IAM, EC2, ALB, S3, ECR), managing remote state via S3 + DynamoDB locking for safe collaborative changes.
- Build and maintain Jenkins CI/CD pipelines automating build, test, and Kubernetes deployment, integrating GitHub webhooks and automated ECR publishing.
- Engineered Python automation scripts eliminating 15+ recurring weekly tasks, improving team efficiency by 30%.
- Serve as primary technical point-of-contact for 20+ production incidents weekly, exceeding SLA resolution targets by 15%.
- Led Root Cause Analysis (RCA) for complex system failures, driving 5 major stability fixes; validated 100+ monthly bug reports via SQL, reducing MTTD by 25%.
- Optimized AWS production environments via Well-Architected remediation, cutting monthly cloud costs by 12%.

Technical Support & Operations Consultant | Kali IO Solutions LLP (Remote)

Jan 2025 – Jul 2025

- Translated customer requirements into 20+ technical specifications for product launches; provided AWS deployment support achieving a 95% client satisfaction score.
- Resolved 50+ pre-deployment technical issues by identifying backend API bottlenecks, ensuring zero-downtime migrations for 3 key accounts.

KEY PROJECTS

Incident Response Runbook Automation Bot | Python, Slack Bolt SDK, CloudWatch, Grafana, Prometheus

- Built a ChatOps assistant automating first-level diagnostics across ~12 incident types, integrating CloudWatch/Grafana/Prometheus into Slack and cutting manual triage time by an estimated 40%.

AWS Cost & Security Drift Detector | Python, AWS Lambda, EventBridge, boto3

- Built a serverless governance tool flagging ~15–20 cost/security misconfigurations monthly (idle EC2, public S3, open security groups), contributing to an estimated 8–10% cloud cost reduction.

Terraform Module Registry for Multi-Environment AWS Landing Zones | Terraform, AWS, Terratest, GitHub Actions

- Built reusable Terraform modules provisioning AWS landing zones across dev/staging/prod, cutting new-environment setup time by an estimated 40%; integrated Terratest with GitHub Actions for automated validation.

Self-Healing Kubernetes Cluster with Auto-Remediation | Amazon EKS, Kubernetes, Python, Helm, Prometheus

- Built an event-driven controller auto-remediating CrashLoopBackOff, OOMKilled, and failed liveness-probe failures, resolving an estimated 70% of common pod issues without manual intervention.

ACHIEVEMENTS & EDUCATION

- Patent Author: “Deep Learning Driven Lip-Reading System” — Published Patent Application No. 202521037574 A
- AWS Skill Builder: Well-Architected Best Practices (Technical), Well-Architected Foundations; AWS Partner Migration Foundations Badge
- B.E., Information Technology — Smt. Kashibai Navale College of Engineering, Pune | GPA: 7.78/10 | 2025
